The screenshot shows the Live Server extension page in Visual Studio Code. At the top, there's a purple icon representing a server. The title "Live Server" is followed by the version "v5.7.9". Below this, the author "Ritwick Dey" is listed, along with a download count of "29.272.906" and a star rating of "★★★★★ (418)". A description states: "Launch a development local Server with live reload feature for static & dynamic pages." There are two buttons: "Deshabilitar" (disabled) and "Desinstalar" (uninstall), followed by a gear icon. A status message says "Esta extensión está habilitada globalmente." Below this are tabs for "Detalles", "Contribuciones de características", "Registro de cambios", and "Estado". The main description repeats: "Launch a local development server with live reload feature for static & dynamic pages." At the bottom, there are two side-by-side images: the left one shows a code editor with HTML code for a web page, and the right one shows a browser window displaying the rendered web page, which is a simple website for "Acme Web Design" with a newsletter subscription form.

Live Server v5.7.9

Ritwick Dey | 29.272.906 | ★★★★★ (418)

Launch a development local Server with live reload feature for static & dynamic pages.

[Deshabilitar](#) [Desinstalar](#) ⚙️

Esta extensión está habilitada globalmente.

[Detalles](#) [Contribuciones de características](#) [Registro de cambios](#) [Estado](#)

Launch a local development server with live reload feature for static & dynamic pages.
